

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE REGULATION OF NEUTRALITY IN
THE ANIMAL BODY¹

CONTENTS

<i>The Regulation of Neutrality in the Animal Body:</i> PROFESSOR L. J. HENDERSON	389
<i>The Physiological Significance of some Substances used in the Preservation of Food:</i> PROFESSOR JOHN H. LONG	395
<i>The Thomas Pennant Collection</i>	404
<i>The Population of New York State</i>	405
<i>Scientific Notes and News</i>	406
<i>University and Educational News</i>	409
<i>Discussion and Correspondence:—</i>	
<i>Relativity in Electromagnetic Induction:</i> PROFESSOR A. L. KIMBALL. <i>Scientific Method:</i> PROFESSOR CHARLES A. ELLWOOD. <i>"More Little Beasts":</i> PRESIDENT DAVID STARR JORDAN	411
<i>Scientific Books:—</i>	
<i>Lydekker's The Horse and its Relatives:</i> PROFESSOR RICHARD SWANN LULL. <i>Starling's Electricity and Magnetism for Advanced Students:</i> PROFESSOR S. J. BARNETT. <i>Parmelee's The Science of Human Behavior:</i> PROFESSOR R. S. WOODWORTH ..	413
<i>Botanical Notes:—</i>	
<i>Fighting the Chestnut Blight; Notes:</i> PROFESSOR CHARLES E. BESSEY	417
<i>The Age of Pithecanthropus Erectus:</i> DR. EDWARD W. BERRY	418
<i>Special Articles:—</i>	
<i>Some Relations between Root Characters, Ground Water and Species Distribution:</i> DR. W. A. CANNON. <i>Inorganic Colloids and Protoplasm:</i> PROFESSOR MAX MORSE	40
<i>Societies and Academies:—</i>	
<i>The American Philosophical Society. The Biological Society of Washington:</i> D. E. LANTZ	425

It was a favorite figure of Cuvier's, recurring again and again in his works,² to compare life with a vortex into which molecules continually enter, from which they continually depart; meantime the vortex remains, and thus the form of a living thing appears to be more important than the substance. Cuvier's analogy, though almost forgotten, is quite as valid to-day as a century ago, but I suspect that the modern physiologist will be disposed to see in such a view a justification of the study of *conditions* rather than a claim for morphology. What, indeed, is the importance of the anatomy of a whirlpool in comparison with the dynamics thereof?

Now it is the study of conditions within the organism which physical chemistry has contributed to physiology—solution, surface tension, the colloidal state, osmotic pressure, ionization, alkalinity or neutrality—and these are dynamical equilibria rather than in any sense morphological elements. To such conditions Cuvier's figure exactly applies, and provides, moreover, the very best means for their systematic investigation; while the conditions, in turn, most fully reveal that which was partly made clear to Cuvier by the imagination of genius, and, in spite of it, quite certainly in part unknown to him.

The right working of physiological proc-

¹ Read in the joint meeting of Section K of the American Association, the American Physiological Society and the American Society of Biological Chemists at Cleveland.
